

Princess Yacht

A Siminetti Case Study

All aboard a Princess Yacht

“Crackle and its unique design reflects light and texture from every angle. Strong iridescent colours flow through the surface with an underlining silver tone. Small cracks crafted into the surface create dramatic texture but are resin sealed and smooth to the touch, ensuring a long lasting strong surface.”

AQUAMARE

### Executive Summary

Siminetti Mother of Pearl surface finishes chosen to add luxury definition to all three of the yachts bathrooms.

14 handcrafted and individual ‘CRACKLE’ mother of pearl decorative panels produced to clients dimensions.

Siminetti ‘Crackle’ was chosen to improve the luxury feel of each bathroom within this new Princess Superyacht, destined for Princess Yachts – Hong Kong.

Client – Private

Contractor – Aquamare Marine Ltd (UK)

Project Completion – 2020

## The Project

Siminetti supplied a large number of our stunning 'Crackle' design panels to Aquamare Marine Ltd (UK) for installation within all three bathrooms of a Princess Yacht. Specially requested by the client, the installation of 'Crackle' on a yacht is a first and the results speak for themselves!

Each 'Crackle' panel was handcrafted from the exacting dimensions required for its location. Each bathroom typically consisted of 3 or more panels with each panel being designed to fit seamlessly alongside the next, resulting in a wall of Mother of Pearl.

From their base in Plymouth, Aquamare Marine Ltd are specialists in the marine industry. They fit out many of the most spectacular yachts manufactured in the United Kingdom and Siminetti is honoured to have consistently worked alongside them for many years.

## Siminetti 'Crackle Surface'

'Crackle' undergoes a unique manufacturing process to ensure we achieve the special characteristics of the design and as with all Siminetti decorative surface panels, they are waterproof, lightweight and sustainably produced making them perfect for Superyachts.

Siminetti Mother of Pearl is sourced from eco-friendly, sustainable sources, are exceptionally strong and suitable for wall and floor surfaces. Crackle is perfect for wet areas, feature walls and spa's.
