## Our Mission

*"To continuously create inspirational luxury surfaces, that are crafted with passion, viewed with awe and are kind to the planet on which we live."*

*Simon Powell, Founder*

# LUXURY SURFACES

Siminetti was founded in 2010 by Simon Powell out of his deep expertise and passion for mosaics and luxury surface finishes.

Simon identified a gap and an opportunity in the luxury interior design market for Mother of Pearl, one of nature's most luxurious and sustainable materials.

Until then, Mother of Pearl was mostly known and used in smaller ways for marquetry and jewellery but Simon wanted to demonstrate the many benefits and versatility of the material, and show designers how they can use it to decorate much larger surfaces to elevate any space - from internal and external walls and floors, to swimming pools, shower rooms, spa steam rooms or furnishings.

Siminetti quickly gained recognition for its innovative approach and Simon's vision led to collaborations with top designers, transforming spaces into stunning works of art. From opulent properties and superyachts to elegant hotels and spa retreats, Siminetti's bespoke designs have set new standards in the industry, cementing the company as a trailblazer in luxury surface finishes.

With a commitment to creativity and excellence, Siminetti continues to inspire and elevate interior design concepts, pushing boundaries and redefining the possibilities of Mother of Pearl.

# BRITISH HERITAGE

Siminetti is a British company based in Chipping Campden, near Stratford upon Avon, home of the renowned playwright, William Shakespeare. The company has built an enviable reputation for exceptional British quality and reliability, making Siminetti the choice for many of the world's leading architects, designers, developers and yacht builders.

Siminetti surfaces are now found in some of the world's most luxurious properties, super-yachts and hotels, and has a global presence that spans across 6 continents, from the bustling cities of North America and Europe to the lavish resorts of the Middle East. Today Siminetti is one of the largest designers and suppliers of Mother of Pearl surfaces in the World.

In 2024, Siminetti proudly unveiled its Flagship Showroom - the first mother of pearl showroom in the world - at its Head Office in the Cotswolds to showcase the exquisite beauty and meticulous craftsmanship of its Mother of Pearl surfaces.

This milestone marked a new era for the brand, solidifying its commitment to redefine luxury and uphold the highest standards of excellence in Mother of Pearl surfaces. A visit to their showroom promises an immersive experience into a world of timeless artistry where designers can admire and be inspired by over 300 surface styles.

# SUSTAINABILITY

Siminetti is proud of its ethical and ecological credentials and takes the greatest care when sourcing its range of natural products, to ensure they meet strict ecological standards and are sourced from sustainable, farmed locations wherever in the world they are grown.

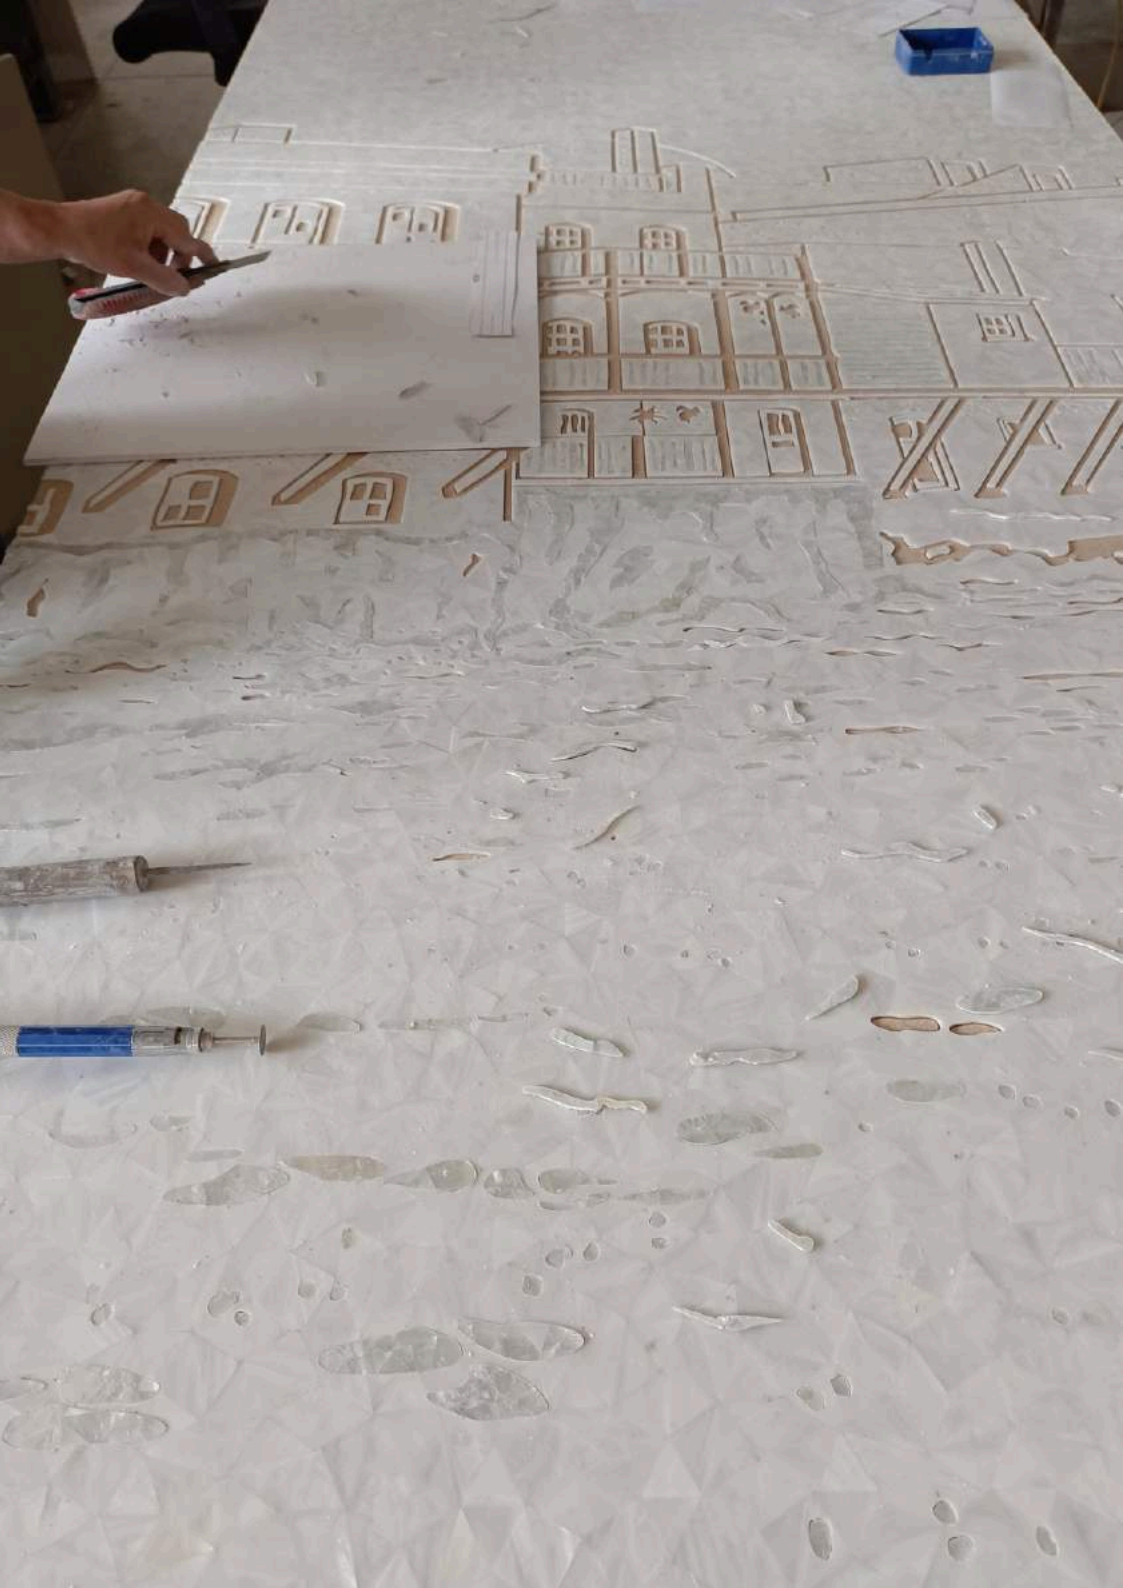

We use two forms of high quality shell, 'Freshwater' Shell and 'Saltwater' Shell. Our shells are grown for the freshwater pearl or food industries and take at least 10 years to grow until they reach full maturity. The shells we source are a bi-product and would be discarded if we were not to use them.

Through its activities, Siminetti supports Pacific communities who depend on sustainable relationships with the ocean lagoons. We absolutely oppose the use of overfishing and exploitation of our world's sea beds and actively engage with ocean charities who look to sustain our oceans for the betterment of marine life and the conservation for our futures.

***ONLY THE FINEST SHELLS SOURCED FROM SUSTAINABLE,  
FARMED LOCATIONS THROUGHOUT THE WORLD.***

# EXPERTLY CRAFTED

Our teams of artisans produce all our luxury Mosaics and Feature Wall Panels by hand, taking great care to ensure each surface is finished to the highest standards and the exacting requirements of our clients.

This is a much longer process than if we used machines, but due to the natural qualities of Mother of Pearl, a machine process would not highlight the stunning and unique qualities of the Mother of Pearl.

## ***BESPOKE DESIGNS***

Siminetti can also design and produce stunning bespoke wall panels and mosaics to your exacting requirements. This journey begins with developing an understanding of your requirements, followed by the development of your bespoke design including 3D visualisations if required. Our expert artisans then handcraft your design to precise tolerances to ensure our product is an exact fit for your project. Then finally the carefully packaged products are shipped directly to you for installation.

***OUR SURFACES ARE HANDCRAFTED TO THE HIGHEST STANDARDS BY OUR TEAMS OF ARTISANS.***
